September 2020 - April 2021

- Stack : Express, Vue, Nuxt, MySQL

Enseignant

Lycée Pauline Roland

September 2017 - September 2020

PROJECTS

[YoutubeTogether](#)

- Web app that lets users watch YouTube videos in sync with each other. Made with Nuxt, express, and socket.io
- Room system which allows users to group by room and share videos and instant messaging with everyone in the room.
- Room owner can pause the video or change timer for everyone, and decide if everyone can control the video or only himself.

[Co-ownership database](#)

- Web app that lets users consult and edit a database of owners, tenants and lots.
- Users can also store and manage pdf documents (bills, quotes).
- Complete authentication system with 4 types of permission (read only, edit, post document and manage documents).

[Bulgnéville notary office](#)

- Notary office website made with Nuxt, Express and MySQL.
- Blog section with integrated WYSIWYG editor for the website owner, and comments / questions for the visitors.
- Real estate section where owner can post announces and see views numbers. Visitors can use all kinds of filters on announces.
